

# Magic Flute

## THE HEAD SETS THE TONE

The Magic Flute is an electronic wind instrument that enables people to play music with only small movements of the head.

The flute requires no hands to play and is rotated up and down to change pitch. The strength of the breath controls the volume thereby allowing for truly expressive performance and improvisation.

- Professional musical instrument with built in sound card.
- Can be played with small head movements and the breath.
- Easy to use with pre-programmed scales and instruments.
- Magic Flute handles for children with cerebral palsy.
- Can be used for Respiratory therapy.
- Online resources and educational material.
- Can be fully operated by the user.
- No musical experience is required.
